## Career Objective

---

B.Tech Computer Science graduate with hands-on experience in Python development, web technologies (HTML, CSS, JavaScript), and MySQL database management. Passionate about creating innovative web applications and eager to contribute to dynamic, collaborative teams.

## Skills

---

- **Languages & Frameworks:** Python, Java, C, JavaScript, HTML5, CSS3, Node.js, Express.js
- **DevOps & Infrastructure:** Docker, NGINX, QEMU/KVM
- **Databases & Tools:** MariaDB, MySQL, git
- **Operating Systems:** Linux, Windows
- **Soft Skills:** Critical thinking, Time management, Fast learner

## Education

---

- |                                                                                        |             |
|----------------------------------------------------------------------------------------|-------------|
| • <b>College of Engineering, Kidangoor</b> , B.Tech in Computer Science<br>GPA: 7.3/10 | 2021 - 2025 |
| • <b>Mary Mount Public School, Kattachira</b> , Grade XII<br>Grade: 92 %               | 2020 - 2021 |

## Projects

---

- **FreqSplit:** Developed an evolving audio processing pipeline leveraging Python and PyTorch for advanced source separation, spectral gating refinement, and post-processing of raw audio files. Integrated with Django backend for API services, WebSocket for real-time communication, and React with TypeScript for a responsive frontend interface. Demonstrated modular design principles for scalability and extensibility.
- **SwiftMeds:** Built a dynamic online medical shop web application using Node.js and Express for backend services, with Socket.io enabling real-time doctor-patient consultations. Implemented secure user authentication, medication browsing, and account management using HTML, CSS, and JavaScript.
- **Self-Hosted Private Network & Web Services:** Deployed a Raspberry Pi server hosting multiple Docker containers for various web services. Configured NGINX as a reverse proxy for efficient routing and SSL termination. Set up Pi-hole for network-wide DNS ad blocking and custom local domains. Established a secure private mesh VPN using Tailscale to enable encrypted remote access and seamless device connectivity.

## Certifications

---

- Internship in Cybersecurity and Ethical Hacking — SkillVertex

## Languages

---

- English — Full Professional Proficiency
- Malayalam — Native or Bilingual Proficiency

## Interests

---

Linux, Back-end Development, Open Source, Continuous Learning, Web Development
